

# Test Bold

This has **bold text** in the middle.

**Entire line is bold**

Regular line without formatting.

Name:  - Required

"Quoted text" works now

Text with punctuation! renders bold

Text with 'single quotes' is bold

Email: user@domain.com shows properly

Price: \$19.99 formats correctly

Text with \* single asterisk works

Complex: "Price is \$19.99!" handles everything

This is a **very long paragraph with bold text** that needs to wrap across multiple lines and should preserve the **bold formatting** even when it wraps to the next line.

**Bold text at the beginning** of a long paragraph that continues with regular text and then has **more bold sections** throughout the paragraph.

Regular text with "quoted bold text that is very long" should wrap correctly.

**Please provide detailed feedback:**

**Additional comments:**

Thank you for your input.
